Type	I/55	January	February	March	Number to be built in January
EBF 80	21,000	21,000	-	-	unspecified
UBF 80	15,000	-	15,000	-	unspecified
EL 83	4,000	4,000	-	-	7,000
TOTAL	750,000	246,500	240,000	263,500	

Comment: In order to produce the required number of acceptable tubes for January, it is necessary to start producing a much larger number. This means, for example, that 19,000 tubes of type 1 Z 1 must be started in order to have 9,500 satisfactory tubes at the end of the production run for the month of January. This at times means that materials for twice as many tubes as are anticipated are used up - EL 81, 1 Z 1 are such extreme examples. These figures are based on actual production experience.

Comment: 20,000 tubes will be started in January for the production scheduled for February. This allows for the scrap and rejects which will be turned out while actually producing the required number of tubes.
